About the Host Farm:

Jobo Farms consists of 400 acres currently being operated and managed by three families. Brothers Henry and Alex Oosterhof and their wives Evelina and Julie are the second generation on the farm. Henry and Evelina's son Steve (Lindsay) is also involved full-time.

On April 4th the Oosterhofs moved their 82-head milking herd from tie-stalls to their new freestall environment. The cows have adjusted well to the Dual Chamber waterbeds and free access to two Lely A4 milking robots.

EastGen Solves. EastGen Leads.
