

KH
CINDERDOOR

The Wait is Over!

Our dairy genetics industry has profited from unprecedented genetic and technological advancements in recent years but still at the core of our efforts is purchasing elite sires from well-bred cow families that have consistently passed on their superior genes. Our first of three proven additions this round, **KH Cinderdoor**, exemplifies this time-tested principle. *The wait is over!* The A2A2 designated **Cinderdoor** debuts with 2882 GLPI, \$1516 Pro\$, solid Milk (+657), +.00% Fat, +.14% Protein and as expected, a pleasing +13 for Conformation. One of Doorman's very best proven sons, **Cinderdoor** stems from the "*Cinderella*" family who traces to the respected "*Tony Rae*" and finally "*The Queen of the Breed - Roxy*". With the best of the best represented on both sides of his pedigree, **Cinderdoor** was born to be great.

Breeders can expect **Cinderdoor** daughters to have deep, open, long and tall frames (+16 Stature, +8 Chest Width, +8 Dairy Character) which will carry their width throughout (+10 Pin Width, +14 Rear Attachment Width). Their Feet & Legs will be suited for any management system (+11 Heel Depth, +10 Bone Quality, +6 RLRV) while their rumps will have a tendency towards ideal to low pins unlike his sire. Their udders will be shallow (6S Udder Depth) with snug Fore Attachments (+9), silky Texture (+12) with his best daughters coming from cows with higher rear udders in need of overall type improvement. If you are looking to breed a real special one, then *the wait is over* with **Cinderdoor**!

CLAYNOOK
TONKA

200H010175

Doorman
x EX-91 Windbrook
x VG-89 9* Goldwyn
x Claynook Tammy Allen
(VG-87-2YR 8*)

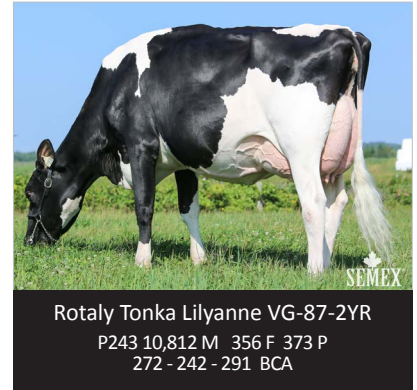

* While Supplies Last

Claynook Tonka is our 2nd addition this round with very limited supply. Unfortunately, this bull is dead and no additional semen is available. What we have is all we will ever have. By Doorman,

Tonka comes from the heart of one of **Claynook Holsteins** most-renowned foundation families. His dam is an EX-91 Windbrook followed by the impressive "*Tickle Goldwyn VG-89 9**" and then the world-famous **Claynook Tammy Allen VG-87-2YR 8***.

We know that **Tonka** should resonate well with our breeders debuting with 2710 GLPI, \$1304 Pro\$, 718 Milk, 21 Fat (-.05%), 33 Protein (+.07%) and +14 Conformation. Breeders can expect pleasing udders (+11 Mammary System), ultra-dairy and capacious frames (+15 Dairy Strength, +17 Height of Front End, +13 Dairy Capacity) and problem-free Feet & Legs (+6). We see the strong influence from both Goldwyn and Allen with respect to **Tonka's** Milking Speed (101) and of added interest, **Tonka** carries the coveted **A2A2** designation. Be sure not to miss out on your opportunity to get **Tonka** into your breeding program.

272 - 242 - 291 BCA

Our final proven addition is **EBA Gentle** (Meridian x Beacon x Toystory). **Gentle** debuts with a GLPI of 2921, \$2070 Pro\$, +2236 Milk, +66 Fat, +50 Protein and a respectable +9 for Conformation. In fact, with nothing but positive values for every type trait, a 115 for Milking Speed, a 105 for Herd Life and a 103 for Calving Ability, **Gentle** makes an easy choice for breeders striving for a healthy and profitable herd. Of added value, the A2A2 designated **Gentle** is part of our expansive **August Proof Specials!**

Other Proven Highlights: **Comestar Lautrust**, our #1 used sire in July, saw gains for both GLPI (3292) and Pro\$ (\$2397) making the current #2 GLPI sire our highest ranked proven sire available today. The **HealthSmart™** designated **Richmond-FD El Bombero** continues to climb up Canada's Top GLPI listing jumping 10 spots to #13 and a further two spots to #18 on the Pro\$ list. Likewise, **Croteau Lesperron Unix** saw increases in his GLPI and Pro\$ due to increases in his Milk, Fat & Protein yields. The **Immunity+™ Unix** held at +15 for Conformation (our #1 for an active proven sire). While holding at a solid +13 for Conformation, our Feet & Legs and Rump specialist **JK Eder-I Control** keeps rolling along with gains in GLPI (3051), Pro\$ (\$1877) and Milk (+926). **Stantons High Octane** also enjoyed a phenomenal round with the addition of over 500 more milking daughters. He gained close to 250 kg of Milk, 12 kg of Fat, 9 kg of Protein and a point of Conformation (to +14). Collectively this led to a huge increase in GLPI to 2906 and Pro\$ to \$1935. **Bombero, Control** and **High Octane** are also all part of our giant **August Proof Specials** as well!

Some Exciting **NEW** **Genomax**™ *Leading Genetics* Additions to EastGen's Holstein Line-Up

Progenesis DROPKICK 3422 GPA LPI Superhero x Kingboy x VG-86 Mogul x EX-90-2E x EX-94-2E
aAa: 324165 **A2A2** x EX-95-2E x EX-95-2E x EX-95-2E DOM 3* x "Starbuck Chancel VG-89-2YR 4**"

- A deeply-bred, highly ranked Superhero with 3422 GPA LPI and \$2549 Pro\$
- Offers outstanding Type (+16 Conf., 3.56 PTAT) and unreal udder potential (+15 Mammary Syst., 2.95 UDC)
- High component deviations (+0.19% F, +0.13% P) from healthy daughters that will stand the test of time (110HL)

Areas to protect: Loin, Body Condition Score

Progenesis KEYSTONE 3371 GPA LPI Detour x Supershot x Mogul x VG-889* Man-O-Man x
aAa: 234165 EX-90 GMD DOM Shottle x 8 more generations of VG or EX dams

- Immunity+ Detour son who is destined to make our breeders money with \$2852 Pro\$ & 3371 GLPI
- Offers solid conformation and a Health & Fertility profile that will serve modern dairymen well (585 Overall Index)
- High production yields (+1933 Milk, 174 CFP) from daughters that are made to last (111HL)

Areas to protect: Chest Width, Body Depth

Westcoast RIGEL 3209 GPA LPI Afterburner x VG-86-2YR Camaro x VG-87-2YR Mogul x
aAa: 423165 **A2A2** Man-O-Man x EX-91-2E Elegant x Whittier-Farms Outside Roz EX-95-2E DOM 2*

- A balanced Robot Ready designated Afterburner son from the impressive "Outside Roz" family
- Offers high deviation milk (+.41% Fat, +.21% Protein) from silky, shallow udders (8S UD, +10 Texture)
- Expect cows that will milk out quickly (107 Milk Sp.), calve out easily (107 DCA) & breed back easily (106 Dau. Fert.)

Areas to protect: Body Depth, Lact. Persistency

Progenesis KENDAL 3064 GPA LPI Jacoby x High Octane x 5G x Epic x VG-889* Man-O-Man x
aAa: 231465 **A2A2** EX-90 GMD DOM Shottle x VG-88 BW Marshall x 7 more gen. of VG or EX dams

- Top-notch Immunity+ Jacoby son with the potential to make some really outstanding ones
- A type pattern which will trigger some excitement (+16 Conformation, 3.85 PTAT, +15 Mam. Syst., 3.29 UDC)
- Improve the fat deviations in your herd (+.20% Fat) & expect a flawless ability to improve your H&F traits

Areas to protect: Calving Ability, Teat Placement

Check out our expanded **POLLED** Line-up! 100% of **NEVER AGAIN-PP** & **JACKPOT-PP** calves will be polled & at least 50% of **ADAGIO-P** calves will be polled. There is no need to sacrifice genetic gain when you use EastGen's **POLLED** line-up.
