ELITE SIRE

A2A2

EIXDALE PWRUP ALONGSIDE
Bred by: Brian Eix, Elmira, ON Photo by: Holly McFarlane

proof and there is still no sire higher for Milk, Fat, or Protein in Canada with his level of Conformation (+8). Our #1 used sire for the last 12 months, the **A2A2** and **Fertility First™** designated **Alcove** is one of our very best for Dairy Strength (+13, second to only **Melarry Fuel** with

+16), and he is now our very best for settling cows with 63 for Semen Fertility. Of note, **Alcove** is also a 101 for the novel **Methane Efficiency** trait which was introduced this proof round. Extensive Canadian data representing over 13M records from 1.6M cows has been analyzed to formulate the new trait and it has been shown to be a very efficient and cost-effective way to select for methane reduction. Dairy producers can expect to achieve a 20-30% reduction in methane emissions from their herd by 2050 depending on their selection pressure. **Alcove**, will continue to be available both as conventional semen and **Day-To-Day Sexed**.

The first proof round of the year has arrived and we saw gains to every category of our expansive Holstein sire line-up. Regardless of your goals, we are confident that our current list of sires will offer the very best genetic solutions available anywhere for your herd.

We will start with the newly proven **Brabantdale Alongside**. The well-bred **Alongside** was destined to be an exceptional type sire from day one. Sired by the sensational **Sidekick**, **Alongside** has a maternal line that is flush with high scoring dams all with extraordinary production records and stemming from the remarkable and beautiful **RC-LC Goldwyn ATM EX-92 DOM 6***. His 3/4 brother, the exciting **Breeder's Edge** sire **Alleyoop**, is generating a lot of buzz already prior to his hotly-anticipated proven debut this fall. **Alongside** sits nicely at the top of Canada's Conformation list debuting with +15 for type while offering more than 1500 kg more milk than his sire and positive fat deviations (+.07%). **Alongside** will sire some really outstanding daughters with exceptional udders (+12 Mammary System), wide and square rumps (+10 Rump, +9 Loin, +11 Pin Width), capacious frames (+9 Dairy Strength), and unreal legs suited for any barn environment (+10 overall, +16 Heel Depth, +12 Foot Angle). **Alongside** will be available **Day-To-Day Sexed**.

Progenesis Knowhow, who added more than two hundred daughters to his proof this round, saw gains for both GLPI (+3463) and Pro\$ (\$2658) despite the annual base roll-back. He also jumped two points for both Conformation and Mammary System to +11 and +9 respectively, and a pleasing 4 points on F&L's to +10! The **A2A2** and **Calving Ease** designated **Knowhow** will be a tremendous bargain as part of our **30 for \$20 Special!**

Other Proven Highlights: **Pine-Tree-I Pursuit** continues to deliver and breeders have taken note making him our #1 used sire with sexed semen (ever). **Pursuit**, who carries the **Calving Ease** and

Robot Ready™ designations, is our #1 GLPI sire (+3644) and Canada's #2 Pro\$ sire (\$3438) and he's breaking new ground on the other side of the border as well with 1016 NM\$, 2949 TPI, 7.2 PL, 1.61 PTAT, and over a point for both UDC & FLC. **Westcoast Alcove** added over 700 daughters to his production
