

# Digest-it<sup>®</sup> for Dairies

## Dairy Effluent Digester

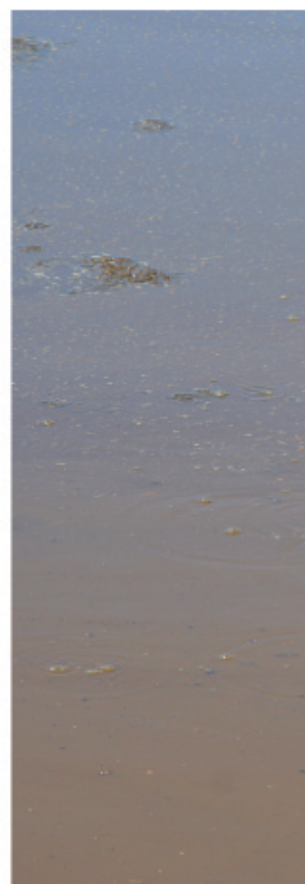

The easy way to create and maintain a balanced microbial environment in effluent ponds

### Get your effluent pond working again!

- Stimulates aerobic microbial activity in effluent ponds
- Digests suspended solids into plant-available liquid nutrients
- Reduces turbidity and increases the liquids to solids ratio
- Dissolves settled out sludge
- Reduces surface crusting, solid waste and the need for desludging
- Reduces unpleasant odours
- Ideal for all types of effluent management systems
- Can also be used as a silage inoculant and to reduce odours in calf bedding

BEFORE

AFTER

Better soils. Better crops. Better stock.™
